

CHIPOTLE'S CULTIVATE NEXT FUND INVESTS IN AI SUPPLY CHAIN SOLUTION AND EMERGING FAST-CASUAL CONCEPT

- Lumachain's SaaS platform uses Computer Vision-based Artificial Intelligence to enhance safety, yield, efficiency, quality, traceability, and trust in food production
- Brassica is a Mediterranean inspired sandwich and salad concept committed to wholesome ingredients and sustainable practices

NEWPORT BEACH, Calif., Oct. 15, 2024 /PRNewswire/ -- Chipotle Mexican Grill (NYSE: CMG) today announced it is making a minority investment in [Lumachain](#), an AI supply chain platform, and [Brassica](#), a fast-casual restaurant concept, through its \$100 million Cultivate Next venture fund. Introduced in 2022, Cultivate Next makes early-stage investments into strategically aligned companies that further Chipotle's mission to Cultivate a Better World and help accelerate the company's longer term growth plans to operate 7,000 restaurants in North America.

Lumachain

Headquartered in Sydney, Australia, Lumachain's mission is to improve how food is produced, for good. The minority female-founded company has developed a traceability solution that, in real-time, tracks the origin, location, and condition of individual items in a supply chain, from farm to table, enabling reduced waste and increased efficiency. Lumachain's traceability platform is complemented by its Computer Vision AI platform that monitors operations inside food production plants, to improve quality, efficiency and safety.

"The visibility in real time and quality data analytics that Lumachain's software provides could optimize the management and quality of perishable goods for the food service industry," said Curt Garner, Chief Customer and Technology Officer, Chipotle.

Brassica

The Columbus, Ohio based fast-casual restaurant serves wholesome, Eastern Mediterranean-inspired cuisine for guests to personalize their own salads and sandwiches. Founded in 2015, Brassica is committed to using high quality, locally-sourced ingredients at its six restaurant locations. The concept provides healthy dining options without compromising flavor. It includes a front-line ordering experience and a welcoming atmosphere defined by natural materials and standout architectural details. Signature items include house-made falafel, baked-to-order organic pita, antibiotic-free meats, roasted vegetables, Brassica seasoned fries, vegan tahini chocolate chip cookies, and fresh-squeezed minty pink lemonade.

"Investing in emerging culinary concepts that align with Chipotle's commitment to using real, fresh ingredients and making craveable food daily is consistent with our mission to Cultivate a Better World," said Nate Lawton, Chief Business Development Officer, Chipotle. "Funding from Cultivate Next's minority investment will help Brassica scale to open new locations and expand to new markets."

Chipotle's Cultivate Next venture fund portfolio includes: [Brassica](#), [GreenField Robotics](#), [Hyphen](#), [Local Line](#), [Lumachain](#), [Meati Foods](#), [Nitricity](#), [Vebu](#), and [Zero Acre Farms](#). Companies interested in collaborating with Chipotle through the Cultivate Next venture fund can apply by emailing CultivateNext@Chipotle.com.
